

Campbelltown Train Station Underpass

Hurley Street underpass connecting the train station of Campbelltown to the city is a recent upgrade to the community of Macarthur. With heavy footpath traffic and cycle ways, the SAB901 drainage channel was ideal with its stylish and appealing look to compliment the gateway to and from the city.

The SABDrain 901 was developed for a high end civil market with the 304 Stainless Steel Wedge wire to complement its features. Safe for commuters, providing heel guard grate as well as improving the aesthetics' of the area while delivering above average provision for drainage.

With this rated polypropylene channel, offering the maximum versatility while delivering a lifetime of low maintenance. This redevelopment is now ready to compliment the city of Campbelltown.
