water drainage systems

CASE STUDY

GREEN GALLERY

SAB508 Channel

- Edgeless Design
- Click-Clack fixing system
- 100mm x 100mm x 1000mm
- Class A Rated

The Green Gallery Nursery in Dural proudly supplies nursery, landscaping, floristry and horticultural industries as well as the best flowering, indoor and succulent plants in Sydney.

The nursery has used the Do It Yourself (DIY) SAB508 channel as a dripping system.

The SABDrain 508 is lightweight and easy to install, making it the perfect drainage system for your everyday gardening. With its durable and edgeless design, the SAB508 now sits between the flowerbeds at the Green Gallery.
