

# The **SAB** Advantage.....

## Recyclable

SABdrain products are made from 100% recyclable products that can be used again in the manufacturing process.

## Ease Of Assembly

The modular design of our channels ensures assembly and installation of the drainage channels is quick & easy; saving time and money.

## Chemical Resistance

SABdrain's superior polypropylene construction, it is able to resist most chemical agents, acids, salts, alkaline, fuels, oils, fats & more.

## Heel Guard

Our heel guard grates are made to the accepted standard of 5/16" (8.5mm), preventing heels from catching on the grate.

## High Strength

The advanced construction of the channel gives it greater structural rigidity, protecting it from damage during and after installation.

## Anti-Slip

Anti-slip nodules giving the grate a slip resistant surface.

100mm x 50mm

500mm x 500mm

Large Range Of Channel  
Sizes

## Lightweight

Easier to handle, transport, and install.
